BioShield[®] 75

EPA
Registered

USDA
Accepted

BioShield[®] 75 provides a durable, invisible microbiostatic coating to inhibit the growth of bacteria (which cause odor, staining, and discoloration) fungi, algae, mold, and mildew in your vehicles. One affordable, easy application will provide long term Proactive Protection. Surfaces protected with **BioShield[®] 75** are more easily and completely cleaned than untreated surfaces.

- Water based • EPA Registered • USDA Accepted on food contact surfaces • Odorless and colorless • Protects a wide range of surfaces • Highly durable • Non-toxic technology after drying • Prevents biofilm buildup • Long term prevention of a wide range of microbial growth
- Non-leaching, mechanical method of efficacy
- Can be wiped, sprayed, or misted on virtually any surface

- Campers
- Motor Coaches
- Rental Cars
- RV Resorts
- Refrigerated Trucking
- Truck and Rest Stops
- School Buses
- Subways
- Transit Buses
- Limousines
